BUTTONS

< Power off mode >

< Stand by screen >

Press and hold the Read button or Function button for 2seconds while pager is in the Off mode. Time and date will appear on the bottom center of the screen.

Upon inserting a battery, pager will vibrate and beep briefly as it enters the normal reception mode.

If there are new unread messages, the **new** icon and the number of unread messages will displayed on the screen.

And if all the messages are read, the number of messages in memory will displayed.

TURNING PAGER ON

When a message is received, the selected Alert will be activated.

Press the Read button to stop the Alert and to read messages.

The following information will be displayed in the order of the newest to the oldest message:
Message number, time stamp and message.

Reading messages with 13 Characters or more

messages with 13 or more characters will display "" at the top right corner of the screen.
Press the Read button to read the rest of the message

0 123456789

A maximum of 14 messages can be locked. Select a message to be locked and press the Function button.

LOCK ?

When "LOCK?" is displayed, press the Read button to lock the message. The Lock icon will be displayed, and the message will be locked.

0 123456789

To unlock messages, select the message to be unlocked and then press the Function button to display "UNLOCK?" on the screen.

UNLOCK ?

Press the Read button.

0 123456789

Locked messages will remain in memory even during low battery power, and while the battery is being changed.

Press the Lamp button twice to escape to the standby screen.

LOCKING AND UNLOCKING MESSAGES

MEMORY

Pager has the memory capacity to store 30 numeric messages, with a maximum of 20 characters per message.

07-04 10:12 A

When the battery capacity falls below the operational level, the Low Battery icon will be displayed and the voltage alarm tone will be activated.

0 1234567890 !

Duplicate Message Indicator will be displayed on the screen when the pager receives a message that is identical to a message in memory.

When changing the battery, you will need to lock all messages you want to save or they will be lost. (Refer to #7 Locking and Unlocking Messages.) When the battery is removed, you will lose the seconds of time that it takes you to replace the new AAA Battery. Warning! Replace battery in Non-Hazardous location only. Use only Duracell MN2400 & Energizer E92.

LOW BATTERY INDICATOR/CHANGING THE BATTERY
